DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 10, 2008 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. **Claims 1-4, 6-13, 15-22 and 24-30** are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 9 and 17 of

U.S. Patent No. 6,954,522 in view of Thomas (US 6,697,642 B1). Thomas teaches identifying inaudible portions of a voice signal within a voice stream carried in the voice communications link (column 9, lines 42-66).

Thomas teaches removing the identified inaudible portions from the voice signal and also teaches embedding the encoded identification information within the voice stream in place of the removed inaudible portions of the voice signal (column 9, lines 42-66).

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the invention using the teaching of Thomas.

This modification of the invention enables the system to embedding the encoded information so that the user would receive the information with voice.

Response to Arguments

4. Applicant's arguments with respect to **claims 1-4, 6-13, 15-22 and 24-30** have been considered but are moot in view of the new ground(s) of rejection.
